

## Key Management with Total Security & Style

### **The Mission:**

- Companies which are currently using traditional method of issuing keys realised that it is difficult, tedious and time consuming to monitor the keys & users.
- ▶ Therefore, there is a need for a solution to prevent unauthorized personnel from drawing the keys and at the same time increase productivity and minimise man hours lost.

*Step 1:  
Upon flashing the Employee ID,  
ProxSafe verifies the card and  
identify the user.*

*Step 2:  
ProxSafe shutter automatically  
opens and flashes the specific key  
that the employee can draw.*

*Step 3:  
Employee can now draw the  
required keys to the area they need  
access to. ProxSafe records  
automatically.*

*Step 4:  
Roller shutter close automatically  
after the employee draws the key.*

### **Our Recommended Solution:**

*ProxSafe Maxx provides simple answers to your daily key questions by means of advanced RFID and network technologies.*

- Keys are centralised at one location, as such employees must produce their card to **ProxSafe**. After verifications, the employee can draw only a specific key as authorised by the administrator.
- The time and member's information are recorded automatically after the member draws/returns the specific key

### **Benefits Of The Recommended Solution:**

- 24/7 Safekeeping the keys from unauthorized personnel.
- Protect the integrity of the keys and their access area.
- Reduce staffs man hours lost and also the hassles of manual documentation under manual key management system.
- Effective tracking of keys during an emergency & 24/7 monitoring from workstation.
- No maintenance cost, do away with locks replacement & duplication of keys
- Better productivity in work environment.
- Fast return on investment.
